Dear Slinger Electric Utility Customer,

Slinger Utilities is just beginning a system wide electric meter upgrade. This will be a two or three year process to replace all of the meters.

Electric meter replacements are scheduled to take place periodically throughout the year. All replacements will take place Monday through Friday during our normal business hours of 7:00 a.m. through 3:30 p.m. You do not need to make an appointment to have this work completed as all electric meters are easily accessible or located outside the home. Utility Technicians from the City of Hartford will exchange the meter at your residence. The two Technicians working on this project will arrive in a vehicle with a Hartford Electric logo and will be identified by the name badges below. Technicians will attempt to notify someone at the premises prior to replacing the meter by knocking on your door. If there is no response, they will simply complete the meter exchange. Meter replacements are typically completed without a disruption of service to the customer or with just a minor interruption of service lasting less than five minutes.

If you have any large objects obstructing access to the electric meter it would be helpful if you move them to allow a safe working space. We appreciate your cooperation as we make this system upgrade.

Sincerely,

Slinger Electric Utility
